

Underwater Video Camera Housing

Professional Grade Drop or Towed Underwater Video Cameras and Systems

We believe that all moments spent exploring marine life are worth capturing. This belief, along with our passion and dedication to marine life, has led us to create our high quality Splashcam underwater cameras and underwater video products. Since 1988, our goal has been to give you the opportunity to document your underwater experiences and gather invaluable HD underwater footage.

Our passion and growing interest in marine life is reflected in our desire to offer high definition underwater cameras that will help expose its wonders and educate others. For those who are just as passionate as we are, we understand the importance of finding the best quality underwater equipment at an affordable price.

We design each camera to withstand extreme environments, from The Bering Sea to The Great Barrier Reef, and require that each of our cameras pass a rigorous quality inspection. Whether you're planning to use our underwater cameras for commercial or recreational purposes, we guarantee that our products will not fail you.

Collecting footage is one of the strongest and most effective ways to educate others on marine life. The underwater images and videos you capture will give the world a more informed and clear perspective of underwater life. and reveal the beauty and mystery that exists beneath us.

DeckScan 20/20 VZ

Features

- ❖ High Resolution Image
- ❖ Variable Zoom (4.0mm-9.0mm)
- ❖ Day/Night Operation
- ❖ Set To View In Any Directions
- ❖ For Bulkhead Installations
- ❖ Waterproof Disconnect at Camera
- ❖ Stylish & Rugged Marine Design
- ❖ Heavy Duty Mount
- ❖ Two Year Factory Warranty

The DeckScan 20/20 VZ (variable zoom) is a robust harsh environment video camera used to monitor areas that you cannot always see. Use for security, docking your vessel and monitoring blind spots. Works with any TV monitor or most of today's navigation centers. This camera is best suited for bulkhead installations.

DEEP BLUE PRO

Features

- ❖ High resolution color picture
- ❖ Low Light Operation
- ❖ Virtually Indestructible Camera Housing
- ❖ Military Grade Umbilical Cable
- ❖ High Bright LED Underwater Lighting
- ❖ Easy Deployment / Recovery
- ❖ Recessed Lens Will Not Scratch
- ❖ No Installation Required, Fully Portable

The Deep Blue Pro underwater video camera is a time tested robust design that consistently satisfies both professional and recreational videographers. Its high-resolution camera and extremely low-light operating capability have made it one of the most widely acknowledged underwater cameras in the industry over the last decade. The external high intensity L.E.D. lighting system and phenomenal color recording capacity put the power of a mini submersible at your fingertips.

DELTA DIVER

Features

- ❖ Low Light Operation
- ❖ Virtually Indestructible Housing
- ❖ Military Grade Umbilical Cable
- ❖ Easy Deployment / Recovery
- ❖ Lightweight and easy to connect to diver
- ❖ No Installation Required, Fully Portable

The Delta Diver is your robust eye to the underwater world. It is designed for diver mounting and can be used for a multitude of other underwater applications. The Delta Vision is the perfect tool for dive site monitoring and much more. High intensity LED illumination is part of the standard package.
